PROFESSIONAL SUMMARY

AI/ML Engineer and Data Consultant with 8+ years of progressive experience across Aerospace, Media/Streaming, Finance, Healthcare, K12 Education, Culinary and Retail. Recently focused on production AI/ML systems (TensorFlow, PyTorch) for personalization, ranking, and real-time decisioning. Proven track record of transforming complex data into high-impact models, scalable analytics platforms, and measurable business outcomes.

SKILLS

Python, SQL, BigQuery, dbt, TensorFlow, PyTorch, Personalization, ML Algorithms, Recommendation Systems, Real-time ML models, Data Pipelines, LLMs, RAG, Cloud Infrastructure, GCP, AWS, Azure ML, Claude code, Streamlit, Azure Open AI, Production ML Deployment, Advanced Analytics, Snowflake, A/B Testing, Data Quality Standards (SLAs & KPIs), Statistical Analysis, Power BI, Tableau, Model Evaluation, Experimentation, Technical Mentorship, Stakeholder Partnership, Cross-Functional Collaboration

EDUCATION

Clark University | GPA: 3.93

Masters in Data Analytics

Worcester, MA

Aug 2024 – Dec 2025

EXPERIENCE

Titans Space Industries

AI/ML Engineer [Remote]

Worcester, MA

Feb 2026 – Jul 2026

- Built production scheduling and optimization pipelines on cloud infrastructure for live data streams, mitigating real-time constraints and maximizing system performance by 28%.
- Led end-to-end ML project lifecycle from data pipelines to model evaluation and deployment, mentoring team members on production best practices

Resilience Inc

Google Analytics Associate [Internship]

Tampa, FL

Aug 2025 – Sep 2025

- Applied advanced analytics, GA4 + BigQuery models, and early ML techniques for user journey personalization and content ranking, increasing adoption and engagement by 25%

Clark University

Research Assistant

Worcester, MA

June 2025 – Oct 2025

- Conducted comprehensive literature review on AI applications across the full spacecraft lifecycle from launch vehicle guidance to in-orbit operations and deep-space exploration

Ernst and Young LLP

Senior Consultant

Karnataka, India

May 2021 – Aug 2024

- Developed PyTorch models and advanced analytics solutions for personalized ranking and recommendation on client analytical platforms, reducing time-to-insight by 32% and boosting engagement by 30%
- Designed cloud-based data pipelines, scheduling intelligence, and real-time ranking features for batch and live data, delivering 28% efficiency gains while mentoring junior consultants

Opteamix LLC

Senior Software Engineer

Karnataka, India

Sep 2020 – May 2021

- Designed forecasting models and A/B analysis with Python, SQL on insurance claims datasets, building performance reporting pipelines that boosted operational efficiency by 30%
- Executed complex data analysis and built self-service dashboards (Power BI) supporting priority initiatives and forecasting

Deluxe Services Pvt Ltd

Senior Software Engineer

Karnataka, India

Sep 2018 – Aug 2020

- Developed automated KPI dashboards and historical reporting solutions, addressing data gaps and improving monitoring processes that accelerated decision-making across business units
- Collaborated with product teams on A/B testing and statistical analysis of media features

CERTIFICATIONS

AWS Cloud Practitioner (2025)	Advanced Data Science (2024)	Databricks Lakebase & BI (2026)
-------------------------------	------------------------------	---------------------------------

PROJECTS (2025-2026)

- Dynamic Content Personalization Engine** | *TensorFlow, PyTorch, Ranking Algorithms, Python*
Built production models that dynamically reorder and highlight content based on real-time user preferences, reducing time-to-content by 35%
- Retail Performance Dashboard Suite** | *Power BI, SQL, Data Visualization*
Built interactive executive dashboards tracking product performance and KPIs across segments, reducing reporting cycle time by 40% and enabling faster stakeholder decisions
- Real-time Recommendation & Analytics Pipeline** | *Cloud Infrastructure, TensorFlow, SQL, Python*
Developed end-to-end ranking and analytics pipeline for personalized content discovery, improving session depth and engagement by 30%
- Automated Data Quality SLA & KPI Monitoring Framework** | *Python, Apache Airflow, PostgreSQL, Streamlit*
Engineered an end-to-end observability engine tracking data freshness, completeness, and schema drift across downstream analytics pipelines, decreasing data issue identification time by 55%
