PROFESSIONAL SUMMARY

AI Engineer – 8+ years designing, developing, and deploying machine learning models, robust data pipelines, and analytical solutions across aerospace, finance, audit, education, and media domains. Expert in Python, SQL, regression/classification/clustering/time-series algorithms, Spark, cloud platforms (AWS/Azure/GCP), A/B testing, and production model integration that deliver measurable business impact through clear insights and visualizations.

SKILLS

Python, R, GCP, Tableau, Power BI, Azure Open AI, AWS, Google Ads, Google Analytics, Advanced SQL, Google BigQuery, Machine Learning Models, Algorithms, Predictive Modeling, Feature Engineering, Model Training & Evaluation, Model Deployment, Production ML Systems, Data Analysis, Trend & Anomaly Detection, Data Pipelines, Data Quality, Production Systems, A/B Testing, Experimental Design, Visualizations, Dashboards, Regression, Classification, Clustering, Time Series Analysis, GCP, Cross-functional Collaboration, Stakeholder Communication, Mentoring

EXPERIENCE

Titans Space Industries Inc — AI/ML Engineer Feb 2026 – Present

• Designed and implemented machine learning models and algorithms for autonomous systems, improving prediction accuracy by 37% and reducing anomaly detection time by 29%.

• Built and maintained robust data pipelines ensuring high data quality and accessibility, accelerating analytical workflows by 41% across aerospace manufacturing datasets.

• Conducted in-depth data analysis to identify trends and patterns, presenting findings that optimized product performance and cut processing latency by 33%

Aramark — Supply Chain Analyst Sep 2024 – Dec 2025

• Designed inventory forecasting models using regression and clustering techniques, reducing stock discrepancies by 34% and improving forecast accuracy by 29%.

• Built supply-chain data pipelines and visualizations, cutting operational reporting time by 40% while ensuring data consistency for decision-making

Resilience Inc — Google Analytics Associate [Internship] Aug 2025 – Sep 2025

• Conducted data analysis and A/B testing on engagement metrics, increasing insight delivery speed by 44% and improving campaign performance visibility by 31%.

• Developed analytical dashboards and data pipelines tracking KPIs, reducing manual reporting effort by 37% across education and gaming datasets.

Ernst and Young LLP— Senior Data Consultant May 2021 – Aug 2024

• Developed production ML models and analytical platforms for medical device clients, improving audit report accuracy by 35% and reducing batch processing time by 38%.

• Created data pipelines and performed statistical analysis on large datasets using Python and SQL, decreasing reporting cycle time by 42% while ensuring data consistency.

• Designed visualizations and dashboards to communicate insights to stakeholders, supporting continuous monitoring of key metrics and raising insight delivery speed by 31%.

Opteamix LLC — Senior Software Engineer Aug 2020 – May 2021

• Implemented classification and regression models for insurance claims analytics, raising detection precision by 36% and reducing processing cycle time by 30%.

• Developed SQL-driven data pipelines and performed trend analysis on large datasets, improving report accuracy by 33% and supporting production system integration.

Deluxe Services Pvt Ltd — Senior Software Engineer Sep 2018 – Aug 2020

• Gathered requirements and produced functional documentation for media streaming systems, improving engagement visibility 22%.

• Created monitoring dashboards and performed experimental analysis on audio/video systems, cutting validation time by 39% through data-driven insights.

EDUCATION

Clark University | GPA: 3.93 **Worcester, MA**
Masters in Data Analytics Aug 2024 – Dec 2025

CERTIFICATIONS

AWS Cloud Practitioner (2025) Advanced Data Science (2024) Databricks Lake base & BI (2026)

PROJECTS (2025-2026)

1. **Customer Behavior Classification Model |** *Python, Scikit-learn, SQL, Spark*
   Built classification and clustering models identifying high-value segments with 89% accuracy, improving targeting precision by 42% through feature engineering and model evaluation

2. **Real-Time Anomaly Detection Pipeline |** *Python, Spark, AWS, Kafka*
   Developed robust data pipelines and anomaly detection algorithms for streaming data, achieving 91% detection rate and reducing false positives by 38%

3. **Time-Series Demand Forecasting System |** *Python, Prophet, SQL, Azure*
   Implemented time-series models and experimental A/B designs for demand prediction, increasing forecast accuracy by 36% and cutting inventory excess by 29%

4. **Interactive Insights Dashboard & Monitoring |** *Python, Tableau, SQL, GCP*
   Created compelling visualizations and dashboards tracking key metrics, accelerating stakeholder insight delivery by 47% and supporting continuous performance monitoring

5. **Production ML Model Integration Framework |** *Python, MLflow, Spark, AWS SageMaker*
   Designed end-to-end pipeline for model development, validation, and production integration, reducing deployment cycle time by 44% and improving model reliability by 33%.
